hennes@zoo-koeln.de

Please use the provided files (cgloss.sty and dgfs2023.cls) with this template and do not change the layout parameters and try to manage with the styles that are loaded by default (i.e., linguex, qtree, tipa). In case you need additional stylefiles or use other definitions, please send them along.

- (1) a. Phonetics: [fə'netiks]  
b. Semantics:  $\llbracket \textit{Bill likes her}_2 \rrbracket^{w,g} = 1$  iff Bill likes  $g(2)$  in  $w$

Lorem ipsum dolor sit amet, ligula suspendisse nulla pretium, rhoncus tempor plac-  
erat fermentum, enim integer ad vestibulum volutpat.

- (2) weil das ein deutscher Verbendsatz ist (Lenerz 1977)  
*because this a German verb.final.clause is*  
'because this is a German verb-final clause'

**We strongly recommend the use of `qtree` (which is loaded by default) or, alternatively, the more powerful `tikz-qtree`. A simple example:**

- (3) a. This is a simple tree  
b.
- 
- ```
graph TD
    XP --> This
    XP --> YP
    YP --> is
    YP --> ZP
    ZP --> simple_tree[a simple tree]
```

Do not forget to include references.
